Ans 1.) Microphone

Microphone is used to listening the voice message.

Microphone uses the audio signals.

Web-camera

Web-camera is used to capture the images to make documents.

Example :- Adobe scanner, doc-etc.

Web-camera uses pixels or resolution for clear images.

Ans 2):- Light Pen is used to read the invisible or visible character. When we fall the Light pen on any page or content in page Light pen scans the character or Light pen read the character and send this characters to computer so that's why Light pen is considered as input devices.

Ans 5):- Input-device ; Input device create and interface between user and input devices such as keyboard, Mouse etc. With the help of input device we enter our data into the computer.

Example :- keyboard, joystick, Mouse etc.

Three input devices are:

- 1.) Keyboard :- With the help of keyboard we enter our data into the computer. Data can be any form it ~~can~~ be numerically or alphabetic. In keyboard there are 104 or 106 keys and 12 functions keys.
- 2.) Joystick :- Joystick is turn around 360° . With the help of Joystick we can play the games or nowadays joystick is also used in car, truck etc.
- 3.) Mouse :- Mouse is a pointing devices. With the help of mouse we can access any folder in our computer.
- 4.) Scanner :- Scanner is also a input device with the help of Scanner App we can easily scanned our document and send the softcopy to other computer.

Ans 4 :- Impact Printer uses the hitting process on paper to print the character. Impact printer strikes the hammer on page and print our character.

Impact printer is very fast ^{with} comparison of non-impact printer. But with the help of Impact Printer we can't print the images.

Impact is less expensive than non-impact printer. Impact-printer use mechanical devices to print the characters.

Types of impact printer are:

- 1.) Line printer
- 2.) Dot-matrix printer

Ans 3. Plotter is used to make the graphical images. With the help of Plotter we make the graphs.
