

Q:- 1) Explain difference between RAM and ROM ?
Ans:-

(i) It is a Primary memory

(ii) It is also known as Non-volatile ^{volatile} Memory

(iii) It is ability of Storage

(iv) Full form -> Random Access Memory

Answer ROM needs more Clarification
(i) It is secondary memory

(ii) It is also known as Volatile Memory

(iii) It is no ability of Storage

(iv) Full form -> Read only Memory

Q:- 2) What are the features of SRAM ?

Ans: SRAM is the part of RAM. It is stored like data, music, content etc. After few months, we can see storage data because because data stored in SRAM. More Elaboration is required

Q:- 4) Explain difference b/w Primary Memory and secondary memory

Ans) Primary Memory

(1) RAM is also known as Primary Memory

(2) It is ability of Storage

(3) In Primary Memory

Answer needs more Clarification.
Secondary Memory

(1) ROM is also known as secondary Memory

(2) It is no ability of Storage
