1 Ans = computer is a electronic device that can store find and storage information, calculate amount and control other machine.

C = common

O = Operating

M = Machine

P = Particular

U = Using for

T = Training

E = Education

R = Research

2 Ans (i) Speed = A computer works with higher much speed and accuracy compared to humans while performing mathematical calculation. Computers can process million of instruction per second. The time taken by computer for this operation is microseconds and nanoseconds.

(ii) Accuracy = A computer perform calculations with 100% Accuracy. Error may occur due to data inconsistency or accuracy.

(iii) Dilligance = A computer can perform million of tasks calculation with the some consistency and accuracy.
