Q-1 Explain the following characteristics of computer?

(i)

Ans: (1) meaning of computer ÷ computer is an electronic device which helps to calculate, mathematic expression.

Input → processing → output

features ÷

(i) Diligence ÷ computer ~~is~~ ~~can~~ done their work with full diligence. there are no error on their works and they do their work with full concentration.

(ii) Versatility ÷ it has versatility quality. They do many function work at one ~~time~~.
e.g. ÷
 └─ music
 └─ preparing document
 etc

↑ Increase

Ans: (2) Characteristics of computer:

(1) Speed: it has high speed as compared to human being.

(2) Accuracy: it does their work with full accuracy.

(3) Less paper work: if we do our work through computer, there is no need of paper, so it saves the paper.

Ans: (3) Meaning of computer:

It is an automatic electronic device which helps to give output if you provide the input.

Diff. b/w Speed and Accuracy:

Speed

Accuracy

(1) In this, computer done there work with ↑ speed.

(1) In this, it done there work with full accuracy.

(2) In this less time consumed.

(2) In this less chance of error.

Ans: (4) Importance of Computer :-

(1) Stop wastage of paper :- if we use computer for our work ↓ need of paper requirement.

(2) Stop wastage of time :- it saves the user time.

(3) Multitasking :- it done their many work at one time. So, it ↑ their importance for user.

Ans: (5) function of computer :-
 Inputting → for storing → processing
 outputting ←

(1) Input :- it refers to the raw facts and figure. it is our unorganized

data @.
 e.g :- if we said 2, 3, 5, 1, 4
 is a sr. no. of student.
 and name Ram, om, Hari

(2) Storing :- it refers to the storing the data.

(3) processing :- it provides the meaningful result so, it is stage of before getting output.

(4) output :- it refers to the final result. it is meaningful for user.

e.g :-

sr. no.	Student
1	Ram
2	om
3	Hari
4
