Class: Lollwar-1867

1. Ans- Diligence:- Diligence in Computer System is use as Calculation in Computer system at more Calculation at same time and Detection in same time is more relative sentence.

ii) Ans Versatility :- Versatility means Computer make many task at same time and same situation and Computer never complets to doing work a later of same time at system.

2. Ans F.C.S Computer System has no = J.G and no fillings It cannot do all work at same time and same situation It cannot do any work without any command given by human.

iii) Speed :- Computer System is faster than human works. It fast doing work and creating many task at same time. It cannot aske It tired and stress full.

(iii) No fillings:- Computer System has no fillings and no guts. It cannot understand the filling like a human being.

3. Adv:-

Speed

Accuracy

(i) Computer done their task very fast

Computer cannot make mistake in its task

(ii) Computer cannot tired and it cannot complain

Computer cannot make mistake like a human being.

(iii) Computer make many task very fast

Computer find and correct many mistakes at same time

Q. Adv (i) Computer can do their task very fast as a human being.

(ii) Computer was very accurate and right as a human being. It cannot make mistake like human being.

(iii) Computer are used in every sector in business and other service. because that's why we call computer is so important now days.

Q. Ans Basic function of Computer :-

(i) Input :- Input is main function in Computer system. It used to input the data in Computer system and we ask our thought to Computer system with help of Input device.

(ii) Output :- Output device is other Input function in Computer system. and we can use it to get our put our data from Computer system.

(iii) Processing :- Processing is main work which Computer take and write data in input and output at same time in give feedback to us at our put data.
