

Test

Q10 Explain :-

- (i) Diligence
- (ii) Versatility

Q11 Any three characteristics of Computer?

Q12 Basic function of Computer?

Q13 Any three difference b/w speed and accuracy?

Q14 Any three reason Computer is important in daily life?

Ans (Q14) In today's life for every person computer is important there is some point which clearly explain that the computer is important :-

- \* It save our time as compare to written works
- \* It saves our files for a long time periods as compare to ~~it~~ hand made files, projects and assignments
- \* It is better than ~~than~~ others speed to do any work in computer as compare to anyone else

Ambala Cantt.

Ans

Speed

Accuracy

\* It saves to lose our time but it ~~time~~ is not all accurate.

It ~~is~~ better better than speed as compare to speed because it is accurate in all but not in time.

Ans (3)

Basic function of computer :-

- \* Input :- That raw material which can provide by a computer user by input devices.
- \* Processing :- ~~time~~ time to understand the command which is given by a command is ~~pro~~ called processing.
- \* Output :- the final result as soon as possible by the computer is called output in this there are another output devices that is give our result in hardest form and it helps to give any command and task to ~~to~~ do our computer program.

~~Storage is the part of the system~~

Storage  $\rightarrow$  Mainly two types of storage is called Internal storage or removable storage :-

① Internal storage where the computer is store our storage for a long time period which can never loss by in future. Computer to lose his storage by a technical accident.

② Removable storage or temporary storage :- In computer the removable storage is called as memory card, pen drive, CD disks etc. An internal storage is copy that file to and from that storage which we can ~~transfer~~ ~~move~~
