

Q-1 Explain the following characteristic of computer :-

(i) Diligence \rightarrow A computer can perform millions of tasks or calculations with the same consistency and accuracy. It doesn't feel any fatigue or lack of concentration.

(ii) versatility \rightarrow versatility refers to the capability of a computer to perform different kinds of works with same accuracy and efficiency.

Q-2 mention any three characteristics of computer in detail.

Ans \rightarrow (i) Speed \rightarrow A computer works with much higher speed and accuracy compared to human while performing mathematical calculations. computer can process millions (1,000,000) in instructions per second. The time taken by computer for their operations in microseconds and nanoseconds.

(ii) Accuracy \rightarrow computer performs calculations with 100% accuracy. Computer performs calculations with accuracy.
