Q-1 Diligence :-

Ans = 6
A computer can perform millions of tasks or calculations with the same consistency and accuracy. It doesn't feel any fatigue or lack of concentration that its memory also make it superior of that of human beings.

Q-(ii) Versatility :-

Ans = 6
A computer has the ability to perform a variety of tasks simple as well as complex.

Q-2
Ans = 6

Three characteristics of computer.

- Speed :- A computer work with multiple much higher speed and accuracy compared to human while mathematical calculation.

→ Versatility → The ability of computer to perform a variety of task as simple as complex.

→ Memory → Memory is the electronic holding place for the instructions and data a computer need to reach quickly. It's where information is stored from immediate B. purpose.

Q-3
Ans
=6

Difference between speed and accuracy in terms of computer.

⇒ (Speed):- (Accuracy):-

Ans)

A computer work much higher and accuracy compared to humans while performing mathematical calculation. Accuracy refers to the degree of exactness.

speed determine how quickly the central processing unit can receive, store and interpret instructions.

Q-4 Reason why computer is important for daily life.

Ans = 6
Computer is become very important for our daily life because with the help of computer we can do our work very fastly and with any type of work any where.

→ Advantage of computer.

→ Speed → A computer work with much higher speed and accuracy.

→ Memory → Memory is the electronic holding
