

Q4)

Ans

Computer became very important for our daily life because with the help of computer we can do our work very fastly and with we can do any type of work any where

→ Advantage of computer

→ Speed → A computer work with much higher speed and accuracy.

→ Memory → Memory is the electron holding place for the instruction and data for the main use.

Q5)

Ans)

Computer is a data processing device that perform four major function: Input, process output and storage. These are basically for basic function of computers = input, storage, processing and output.

These are described below: Input:

Q1.

- Ans => i) Diligence - is the capacity of the computer of performing repetitive task without getting tired. Its memory also make it superior of that of human beings
- ii) Versatility - The ability of computer to perform a ~~wide~~ variety of tasks simple as well as complex

Q2.

Ans => Speed accuracy diligence storage capability and versatility are some of the key characteristics of a computer.

Q3.

Ans => (Speed) :- (Accuracy)
A computer work much higher and accurate compared to humans while performing most mathematic of calculation Accuracy refers to the degree of exactness speed determine how quickly the central processing unit can receive and interpret instruction.
