## Ans-2 Application of Computers:

Some of the areas where computers are being used are as follows. These applications in detail are:

- i) Banking: Computers are used in banks for electronic money transfer, making deposits, vouchers, bank sheet etc.
- ii) Education: Computer is a very effective tool which can be used for education teaching and learning result processing, student data processing, notes preparation, etc.
- iii) Offices: Computers are used for preparing reports, storing/deleting reports, updating reports, etc in office.

Ans-3 Laptops and general-purpose CPUs are not considered to be embedded computers for several reasons. First, the word "embedded" implies that the computer must be contained in a larger mechanical or electronic system. The word "computer" is typically thought of as a computer that stands on its own.

## Ans-4 Terms of Computer:

- i) Data: Unprocessed words, facts and figures, like numbers, text on piece of paper etc.

i) Information - When data is processed, organized & stored or presented in a given context so as to be useful. Then it is called information.
