

Test of Horizon Skill Center  
Computer as a System

Section 1

Q2. \_\_\_\_\_ refers to the Physical Components of a Computer that can be seen and touched by the user?

Ans Hardware refers to the Physical Components of a Computer that can be seen and touched by the user

Q1. What do you understand by the term Computer Architecture?

Ans Computer is an electronic device (Machine) its very fast technology. Computer Architecture means it is an Technology and High Processing

Section 2

Q4. Explain the given terms:

• CPU → Central Processing Unit

CPU is a Computer's Brain. CPU is Advance Technology of Computer Science.

CPU and ALU is Computer units (Q.6)  
processing unit ← CPU      ALU → Arithmetic  
logical unit.

1

Q6. what is bar code reader?

Ans. Code reader is connected to All coding  
Bar code reader is a part of computer.  
6 Science

Q7. what are the steps involved in following  
a particular instruction given by the CPU?

Ans. CPU → Central Processing Unit

CPU is all instruction and commands  
of the computer

1  
2

### Section 3

Q8. what type of operation does arithmetic  
and logic unit performs?

ALU (Arithmetic Logic Unit) is very  
important of computer. Computer operation  
is ALU perform by the My P.C.

What basic operation does the control unit perform?

Control unit is a basic unit of computer. Its use is different from computer operation. Control unit is different unit of central processing unit.
